The International Festival of Vietnam Rice Industry - Hau Giang 2023 takes place in Vi Thanh City, Hau Giang, featuring a series of events and conferences dedicated to the rice industry, all under the overarching theme 'Green Rice for Life.'

The festivities kick off with the opening ceremony of the "Vietnam Rice Road" Exhibition on December 11.

The rice road, stretching along Xang Xa No Canal and Tran Hung Dao Street, serves as an exhibition space showcasing the thousand-year journey of Vietnamese rice, from its early stages to a period of prosperity and continuous development.

Vietnam has achieved remarkable success in rice production in recent years, making a substantial contribution to ensuring national food security and maintaining its position as one of the world's leading rice exporters, with constant growth in export turnover.

The International Rice Festival provides an opportunity for exchanging information, sharing experiences, and coordinating policies to promote trade and investment in the rice industry, fostering global food security, prosperity, and sustainable development.

In this same location, the festival organisers will launch the implementation of the Project "Sustainable Development of One Million Hectares Specialising in High-Quality Rice Cultivation and Low Emissions, Associated with Green Growth in the Mekong Delta until 2030."
