Nestle Introduced plant-based version of Milo in Thailand

15 February 2022 | News

Nestlé is shaking up the beverage market in Thailand with a new plant-based version of Milo, the worldâ??s leading chocolate malt beverage.

The new ready-to-drink product is based on soy combined with the unique Milo malt flavor, to provide a nutritious plant-based alternative

Nestlé is shaking up the beverage market in Thailand with a new plant-based version of *Milo*, the worldâ??s leading chocolate malt beverage.

The new ready-to-drink product is based on soy combined with the unique *Milo* malt flavor, to provide a nutritious plant-based alternative.

Consumers in Asia are looking to include more plant-based alternatives in their diet, and Nestlé is launching versions of some of its most-loved beverages in the region. That includes launches of *Milo* and *Nescafé* in Malaysia, and *Nescafé* and *Starbucks* in Japan.

The new *Milo* Soy has strong nutritional values. A 180ml carton offers around 5 grams of protein, is high in calcium and contains vitamins and minerals. The carton is designed for recycling and comes with a paper straw.
