

Agrotop to bring new line of smart poultry solutions

12 February 2019 | News

Agrotop, a leading global player in livestock turnkey projects, together with its partner companies, will present a full line of innovative solutions for the poultry industry at VIV Asia 2019, which will take place at Bitec on March 13–15, in Bangkok.

The company will introduce the worldâ??s first chick embryo monitoring system, novel technology for optimal management of poultry farms, as well as Agrotopâ??s vertical integration solutions

Agrotop, a leading global player in livestock turnkey projects, together with its partner companies, will present a full line of innovative solutions for the poultry industry at VIV Asia 2019, which will take place at Bitec on March 13–15, in Bangkok.

The company will display its full range of solutions for livestock construction projects at stand 3660, Hall 99. Together with partner companies LIVEgg and Poultrix, Agrotop will also present new cutting edge technologies including:

- **CrystalEgg** – The worldâ??s first embryo monitor capable of directly identifying the embryoâ??s physiological signals and providing real-time information about the embryoâ??s well-being. The innovative solution, developed by LIVEgg, will be launched for the first time in the Asian market.
- **Poultrix management tool** – An easy-to-use cloud-based technology enabling broiler and layer farmers to efficiently manage every aspect of their farms. The system, developed by Poultrix, provides integrated poultry companies with a remote, real-time monitoring system to ensure operational efficiency and reduce costs.

Agrotop, a one-stop shop for all livestock turnkey projects, offers the following services:

- Concept and design
- Feasibility and business study
- Buildings and equipment
- Monitoring
- Knowledge transfer

Agrotop has designed and erected partial and full vertical integration projects on several continents, achieving excellent growth and financial results. Agrotopâ??s clients the region include companies in Australia, New Zealand, India, Nepal, Japan, Vietnam, China, Sri Lanka, Taiwan and the Philippines.
