

Nestlé® Indonesia invests CHF 99 M to increase production

31 July 2019 | News

Nestlé® Indonesia has announced the expansion of its three factories in Karawang (West Java), Kejayan (East Java) and Panjang (Lampung).

The investment will allow Nestlé® Indonesia to increase its production capacity by 25%.

Nestlé Indonesia has announced the expansion of its three factories in Karawang (West Java), Kejayan (East Java) and Panjang (Lampung).

The CHF 99 million investment will allow Nestlé Indonesia to increase its production capacity by 25%. The cumulative expansion is intended for a new production line for liquid drinks, such as *Milo* and *Nescafé* Ready to Drink, pure sterilised milk *Bear Brand* and *Maggi* seasoning.

“We recognize an increasingly conducive business opportunity in Indonesia, coupled with the growing demand of consumers towards Nestlé’s nutritious and high-quality food and beverage products. Producing value added products has been one of our efforts to improve the quality of life and continue to contribute to a healthier future for Indonesians,” said Dharnesh Gordhon, President Director of Nestlé Indonesia.

Currently, Nestlé factories in Indonesia produce *Cerelac* infant cereal, *Milo* chocolate malt drink, and *Dancow* and *Lactogrow* milk powder, as well as instant *Nescafé* soluble coffee and coffee mixes.
