Rice baby powder

Thai rice innovation for modern moms and healthy childcare.

Baby powder made from pure organic rice flour is gentle, safe, talcum-free and hypoallergenic.

- ✓ Highly refined and gentle, suitable for baby's sensitive skin.
- ✓ Three times more humid and oil-absorbent than most baby powder.
- ✓ Reduces rash and skin irritation.
- ✓ Biodegradable and leaves no residue in the body.

Rice baby powder is proven not to cause allergies, lung disease or ovarian cancer. It is the perfect choice for the modern mom to care for the baby and the environment.

The Department of Foreign Trade, Ministry of Commerce, Thailand, has introduced a project called "Think RICE, Think THAILAND" to encourage the international community to pay attention to consumer health and to raise awareness on the national crop by providing a wider range of knowledge about Thai rice. Today, by using modern technologies and cutting-edge innovations, Thai rice has been developed and progressed to meet the ever-changing demand of global consumers.

With Thai rice, new food products, as well as innovative non-food products, can be created. For instance, rice baby powder is a true innovation for modern moms and healthy childcare.

The Ministry of Commerce explained that baby powder made from pure organic rice flour is gentle, safe, talcum-free and hypoallergenic. It is highly refined and gentle, suitable for baby's sensitive skin. It has three times more humid and oil-absorbent than most baby powder. Rice baby powder can also reduce rash and skin irritation and since it is biodegradable, it leaves no residue in the body. It is also proven not to cause allergies, lung disease or ovarian cancer.

Rice baby powder is the perfect choice for the modern mom to care for the baby and the environment.
