**The alliance combines Esau & Hueber's expertise as a total solution provider within the brewing process and NDL Craft's strong manufacturing capabilities in China**

Esau & Hueber, a leading brewing technology supplier for over forty years, a member of the Bauer Group, and NDL Craft, a China-based global manufacturer of high quality brewhouse equipment and tanks has announced a new strategic alliance.

The alliance combines Esau & Hueber's expertise as a total solution provider within the brewing process and NDL Craft's strong manufacturing capabilities in China.

Esau & Hueber's Managing Director, Christoph Sedlacek, commented "This strategic alliance is the consequence of changes within the structure and demands of our customers in a world where global supply chains demand Best Price solutions on the supply side. Decades of technical developments in combination with state of the art automation concepts like our WinBrew® system are the basis for success."

President of NDL Craft, Lyman Luan, commented, "We're excited about the significant potential to increase our global market penetration in working with a high-technology European partner like Esau & Hueber. They are an industry leader in Brewing, Engineering, Yeast-Technology and Automation."

Harald Koch, Managing Director of Esau & Hueber, added "by partnering with NDL Craft, we are in better position to serve our global customer base with high quality brewing equipment, shortened lead times and optimized customer services. The CRAFT LINE systems we have developed cater to the special needs of craft breweries. These systems are expandable in their capacity and they bring professional technology with high flexibility into harmony."
