

VeChain launches blockchain-enabled food safety solution

13 August 2020 | News

As the world's leading enterprise-friendly public blockchain platform and company, Shanghai headquartered VeChain officially launches its market ready, blockchain-enabled food safety solution based on its one-stop data Blockchain-as-a-Service (BaaS) platform VeChain ToolChain™.

The solution allows blockchain technology to be deployed in the food sector with the fastest lead time

As the world's leading enterprise-friendly public blockchain platform and company, Shanghai headquartered VeChain officially launches its market ready, blockchain-enabled food safety solution based on its one-stop data Blockchain-as-a-Service (BaaS) platform VeChain ToolChain™.

The solution allows blockchain technology to be deployed in the food sector with the fastest lead time compared with any other platform in the industry. The VeChain ToolChain™ powered Food Safety Solution integrates VeChain's industry-leading technology and experience with business-ready technical features, solving the most urgent needs for the food industry in this new era.

The VeChain ToolChain™ powered food safety solution is characterized by its high standardization, light cost and flexible payment in the market. Most importantly, VeChain ToolChain™ also offers customizable tools and whitelabel services, where consultant companies can obtain and implement the Food Safety Management Service for their own clients.

VeChain now has specialization in F&B traceability based on accumulated know-how and refined technology. Joining hands with its strategic partners, PwC and DNV GL, VeChain aims to expand the business globally to address business needs of more enterprises in the food industry.
