The new NAN CARE range has been developed using probiotic strains

Nestlé has launched *NAN CARE*, a new probiotic supplement range specifically designed to give Aussie parents the options to help support their babies' and toddlers' growing immune and digestive systems.

The new *NAN CARE* range has been developed using probiotic strains to offer parents three supportive supplements for either infant colic, immune health, and healthy bone development, or everyday gut and digestive health. "Our new *NAN CARE* infant supplements range provides new mums and dads with options from a trusted brand, to confidently support their baby's individual gut health needs."

The new *NAN CARE* range includes:

- ***NAN CARE* Probiotic Drops for Infant Colic Relief:** A probiotic supplement designed for infant colic relief. With probiotic *Lactobacillus reuteri* (DSM 17938) helping restore the balance of good bacteria in the digestive system. Suitable from birth.
- ***NAN CARE* Probiotic Drops for Infant Immune Health:** A probiotic supplement with vitamin D for infant immune health. A convenient combination of probiotic *Lactobacillus reuteri* (DSM 17938) and vitamin D supporting a healthy, balanced gut microbiota, with vitamin D promoting healthy bone development and immune system function. Suitable from birth to 3 years.
- ***NAN CARE* Probiotic Drops for Everyday Gut & Digestive Health:** A probiotic supplement designed for everyday gut and digestive health. With probiotic *Bifidobacterium lactis* (CNCM I-3446) can help all infants experience the joys of a healthy, balanced gut microbiota every day which can particularly support babies born by C-section. Suitable from birth to 3 years.
