

A global food delivery company Launches New Engineering Centre in India

10 March 2022 | News

Deliveroo, a global food delivery company operating across Europe, the Middle East, Asia, and Australia, announces the launch of its India Engineering Centre in Hyderabad.

Deliveroo's multi-year plan is to expand its world-class engineering capabilities with a new team that will be focused on delivering superior experiences

Deliveroo, a global food delivery company operating across Europe, the Middle East, Asia, and Australia, announces the launch of its India Engineering Centre in Hyderabad.

Deliveroo's multi-year plan is to expand its world-class engineering capabilities with a new team that will be focused on delivering superior experiences for Deliveroo customers, restaurant and grocery partners and delivery riders, and building highly scalable, reliable and innovative next-generation products for its worldwide operations.

The Engineering Centre in Hyderabad will be a core part of Deliveroo's central technology organisation. The company has already started recruiting and plans to employ over 150 engineers in India from the fields of analytics, platforms, automation and machine learning by the end of 2022. The Engineering Centre will be Deliveroo's largest technology hub outside the United Kingdom, where the company is headquartered.
