Cultivated in clear water and fertile soil, it has a clean, transparent texture, excellent taste, and good preservation properties

Cultivated in clear water and fertile soil, it has a clean, transparent texture, excellent taste, and good preservation properties

Korean company Babizoa's newly released turmeric rice is not only delicious with natural sweeteners but also premium rice containing turmeric, a natural health ingredient turmeric. Cultivated in clear water and fertile soil, it has a clean, transparent texture, excellent taste, and good preservation properties. Even if cooled, it is loved by consumers for its chewy texture and delicious taste.

Yellow turmeric has long been known to increase immunity and is rich in curcumin, which helps the human body. In addition, 80 per cent of turmeric with warm properties is made in India and has a strong bitter taste.

Founded in 2010, Babizoa is an honest food company that does its best to provide delicious, healthy and happy food to domestic and global consumers through functional rice, organic rice, and functional mixed grains.
