New customers underscore significant interest in ScaleUp Bio's unique CDMO value proposition to the global food tech industry

New customers underscore significant interest in ScaleUp Bio's unique CDMO value proposition to the global food tech industry

ScaleUp Bio, a pioneering, Singapore-based, CDMO provider of submerged microbial precision fermentation facilities, expertise and services announced an initial list of customers, underscoring strong global interest in the company's unique value proposition:

Collaboration agreement with Australia's Nourish Ingredients, to support its Asian growth strategy signed letters of Intent with USA's C16 Biosciences, Malaysia-based Ultimeat, and Singapore's own Allium Bio to explore the development of sustainable ingredients for the Asian marketplace

Nourish Ingredients, C16 Biosciences, Ultimeat, and Allium Bio are amongst other prospective customers each leverage submerged microbial and precision fermentation to develop sustainably produced ingredients for novel foods. ScaleUp Bio is playing a vital role in providing these innovators in the food tech space with a bench-to-market pipeline, aiding them in scaling up to pilot-scale commercial production, breaking into Asian markets and beyond. ScaleUp Bio is collaborating with its first customer partner, Australia's Nourish Ingredients, to bring sustainable fermentation-based speciality fats to an Asian audience. ScaleUp Bio is uniquely positioned via its specialised expertise to deliver assistance, insights, and regulatory advice for companies to succeed in Asia.
