Myrkl (pronounced myr-a-kle) is the new liver function and detox support supplement that is taking the world by storm. This innovative supplement contains patented AB001 which activates in the gut and contributes to reducing the amount of alcohol absorbed in the digestive tract before it reaches the liver. Sounds simple but Myrkl is the result of more than 30 years of scientific research and development. Myrkl sold out within 24 hours after its release in the UK, with hundreds of reviews from the UK media. Now it's arrived on New Zealand soil.

Viktor Sylvan, CEO of Myrkl says: "Our ground-breaking innovation enables people to enjoy socialising without compromising their performance and wellbeing the next day. With Myrkl we want to promote a responsible yet carefree lifestyle and that's why we recommend following national health guidelines regarding alcohol consumption and we don't encourage excessive alcohol consumption in any way."

For optimal effectiveness, simply take two capsules 2 hours before refreshments. It's suitable for both vegetarians and vegans.
