Typhur, with its newly launched products, is redefining culinary precision and making superior cooking tools more accessible at home

Typhur, with its newly launched products, is redefining culinary precision and making superior cooking tools more accessible at home

Typhur Inc, a pioneer in innovative smart kitchen appliances introduced two groundbreaking kitchen solutions:Â Typhur Sync Wireless ThermometerÂ andÂ Typhur Sous Vide Station. With industry-leading technology and highly integrated and user-friendly product design, the new devices bring precision and simplicity throughout the cooking process, upgrading your cooking experience to the next level.

With the revival of home-cooked meals, people are looking for advanced culinary methods and kitchen gadgets to level up the enjoyment of home cooking. Typhur, with its newly launched products, is redefining culinary precision and making superior cooking tools more accessible at home. Typhur's innovative products empower home chefs to prepare perfect meals effortlessly, allowing them to take their culinary experiences to new heights.

Typhur Sync, priced at \$229, is available on both the official website and Amazon. From November 6th to November 8th, the device comes with an exclusive launch promotion offering all customers a \$30 discount.

Typhur Sous Vide Station, retail for \$1199, is available on Typhur's official website. A limited quantity of extra \$200 discount will be offered to customers on a first-come, first-served basis.
