The ice maker boasts an impressive capacity, producing up to 37 pounds (17 kg) of Nugget Ice daily

The ice maker boasts an impressive capacity, producing up to 37 pounds (17 kg) of Nugget Ice daily

Oraimo has unwrapped a noteworthy addition to its product lineup—a cutting-edge ice maker, Nugget Ice Maker Series OIM-512A, that promises to elevate the home ice experience to new heights. This innovative appliance arrives as a thoughtful gift to usher in the Christmas and New Year.

At the heart of Oraimo Nugget Ice Maker Series OIM-512A is the appliance's unique ability to produce Nugget (Sonic) Ice—a feature that distinguishes it from conventional ice makers. Sonic Ice chills drinks quickly and does not melt as quickly as crushed ice. Comprising small, chewable pellets, this distinct ice variant has garnered attention for its satisfying crunch and tooth-friendly characteristics.

In terms of performance, the ice maker boasts an impressive capacity, producing up to 37 pounds (17 kg) of Nugget Ice daily. The incorporation of an upgraded compressor, enhancing refrigeration efficiency, and upgraded fans, minimizing noise levels, aligns the appliance with contemporary consumer demands for eco-conscious and user-friendly technology.

Measuring a modest 12.8DxW9.57x14.9H inches and 26.7 Pounds, the Oraimo Nugget Ice Maker is almost the size of an ordinary pressure cooker. Its space-saving design lends itself to easy integration onto most countertops. The minimalist dimensions further enable convenient storage when the appliance is not in use, catering to the practical considerations of modern living.
