

SIG and DPA Brasil introduce spouted pouch packaging for yoghurt

29 March 2024 | News

The packaging solution, a pre-made spouted pouch including closure (SIG CloverCap 85RO), and filling equipment, the SIG Prime 120, delivers a light, robust, easy-to-handle pack that makes consumption very simple

The packaging solution, a pre-made spouted pouch including closure (SIG CloverCap 85RO), and filling equipment, the SIG Prime 120, delivers a light, robust, easy-to-handle pack that makes consumption very simple

SIG is consolidating a strategic partnership with DPA Brasil, strengthening its operations in the Brazilian market. With brands such as Leite MoÃsa, Nescau Prontinho, Nature's Heart, Nesquik, and others already part of its customer base in Brazil, SIG took over the production of spouted pouch packaging for the Chamyto brand yoghurt line in 2024.

The packaging solution, a pre-made spouted pouch including closure (SIG CloverCap 85RO), and filling equipment, the SIG Prime 120, delivers a light, robust, easy-to-handle pack that makes consumption very simple. This also means that children are supported in eating independently. The strawberry flavour of Chamyto yoghurt was the first DPA product to be packaged in SIG's spouted pouch packaging. The partnership with DPA Brasil will also include packaging for Chamyto fruit vitamin yoghurts, Chambinho Recreio and Ninho Lancheirinha.

Vanessa Lima, Marketing Manager at DPA Brasil said, "It is important to us to offer parents and caregivers a product line that contributes to children's independence, and the packaging provides this. The Chamyto yoghurts themselves remain unchanged and retain their taste, quality, and nutritional value."
