The new partnership will further offer faster delivery time, making it easier and more efficient for businesses in the UAE and the wider region to access essential food supplies

The new partnership will further offer faster delivery time, making it easier and more efficient for businesses in the UAE and the wider region to access essential food supplies

DP World has teamed up with Maalexi to offer new efficiencies and access to a wider range of food products at Jebel Ali Port, which will provide another transformation to food security in the Gulf area.

The agreement with Maalexi, the UAE-based dynamic risk management platform for SME agri-businesses, is expected to leverage DP World's global network and advanced temperature-controlled storage at Jebel Ali Port, according to a press release.

The new partnership will further offer faster delivery time, making it easier and more efficient for businesses in the UAE and the wider region to access essential food supplies.

Maalexi offers proprietary technologies that inspect, monitor, and control climate conditions for food and agricultural produce, which ensure continuous stock updates and price-locking for buyers of Maalexi-owned produce across the Gulf, which imports as much as 85 per cent of its food supplies.
