The oat milk alternative option will also be available for selected drinks on the menu

Luckin Coffee announced the launch of its much-anticipated Oat Milk Series, featuring the Oat Milk Latte and Oat Shakerato - both made with OATLY Barista Edition Oat Milk! Perfect for those seeking plant-based alternatives or lactose-free options, this new series offers a delicious way to enjoy your coffee without compromising quality.

The Oat Milk Latte will be available at a special launch price, making it one of the town's most affordable oat milk-based coffee drinks. Crafted with velvety oat milk and a unique Ristretto extraction process that enhances its bright sweetness, this latte delivers a burst of oat-powered brilliance with every sip, proving that oat is truly the GOAT (Greatest Of All Time) of plant-based drinks!

In addition to the Oat Milk Latte, Luckin Coffee will launch the Oat Shakerato a new addition to its existing menu. Creamy, lactose-free, and shaken to bubbly perfection, it combines the richness of oat milk with the bold intensity of espresso. The Oat Shakerato is perfect for those looking for a refreshing, lactose-free, plant-based drink on hotter days.
