MIRAILAB BIOSCIENCE has launched sales of its original supplement brand "MIRAI LAB," which contains β -Nicotinamide Mononucleotide (β -NMN) and is now available in the UAE. NMN is a nutrient widely researched worldwide for its potential effects on anti-ageing and rejuvenation. It has garnered significant media attention for its promising properties.

MIRAILAB BIOSCIENCE company offers a range of products designed to promote health and beauty, including the "NMN Pure Series," a line of NMN supplements that feature a high concentration of β -NMN only. Additionally, develop other supplements and cosmetics to support overall well-being.

NMN (Nicotinamide Mononucleotide) is a nutrient derived from nicotinamide, a form of Vitamin B3, and is naturally present in the cells of all living organisms. While NMN is naturally synthesized in the body, its production capacity decreases with age, leading to a decline in the body's repair functions.
