iBoozee launches smart robotic juice machines in Singapore

19 September 2025 | News

The iBoozee vending machines are the first in Asia to feature Dual Fruit Dispensing Technology

The iBoozee vending machines are the first in Asia to feature Dual Fruit Dispensing Technology

iBoozee, an ASEAN Award-winning innovator in the food and beverage technology sector, has reached a new milestone in its expansion with the launch of its Smart Robotic Mixed Fruit Juice and Apple Machines in Singapore. This unveiling, following over a year in the market, reaffirms iBoozee's leadership in redefining healthy, on-the-go choices through freshness, innovation, and lifestyle convenience.

The iBoozee vending machines are the first in Asia to feature Dual Fruit Dispensing Technology, allowing customers to enjoy either pure apple juice, orange juice, or a customised mix of freshly pressed on demand. Each serving contains the equivalent

of 3 to 4 apples or oranges, with no added sugar, water, or preservatives, making it an excellent choice for anyone living in a fast-paced city who wants to stay fit and alert.

Deric Yeo, Group Chief Operating Officer of iBoozee, stated, "We believe that true wellness shouldn't be complicated or costly. In the midst of a hectic day, a healthy choice should be the easiest one to make. That's why we created our Smart Robotic Mixed Fruit and Apple Juice: to offer a drink that is not only refreshing and affordable, but genuinely better for you. Whether you're a student rushing to class, a professional powering through an afternoon, or a parent seeking a nourishing momentâ??this is for you. iBoozee is our commitment to making wellness convenient, accessible, and within everyone's reach."
