A groundbreaking functional mushroom beverage that ushers in a new era of wellness-focused refreshment

Sunstone Winery, one of California's most iconic wine estates, announced the launch of SOLIS, a groundbreaking functional mushroom beverage that ushers in a new era of wellness-focused refreshment.

As alcohol sales decline worldwide, consumers are seeking balance, wellness, and connection in new ways. Sunstone has responded by creating SOLIS, a sparkling, cognitive-enhancing social beverage developed with InfusedBySplash, leaders in advanced functional beverage formulations.

Made with Lion's Mane, Cordyceps, Yerba Mate, L-Theanine, and Alpha GPC, SOLIS blends globally celebrated functional ingredients into a refreshing elixir that delivers clarity, calm energy, and mood supportâ??without alcohol, added sugar, or compromise.

"Having formulated hundreds of functional products, I can confidently say that SOLIS is unlike anything the market has seen," said Kalon Baird, Founder of InfusedBySplash.

Sunstone President Teddy Cabugos added, "We are witnessing a cultural shift that only comes once in a generation. People are moving away from alcohol and seeking healthier options. SOLIS is that solutionâ??a beverage designed for those who choose to drink less or not at all, yet still want to enjoy an elevated mood and sense of connection."
