Nutrify Today C-Suite Sumflex Becomes the Zero-Delegate Sumflex

11 May 2026 | News

Mumbai is emerging as the â??Davos of the nutraceutical industryâ? a high-impact global hub where science, regulation, investment, pharma, ingredients, AI, formulations and international trade corridors converge

Mumbai is emerging as the â??Davos of the nutraceutical industryâ? a high-impact global hub where science, regulation, investment, pharma, ingredients, AI, formulations and international trade corridors converge

Nutrify Todayâ??s flagship C-Suite Sumflex is entering a new global phase with a powerful repositioning: the platform is now evolving into the Zero-Delegate Sumflex, an invite-only, privilege-access business forum curated exclusively for decision-makers who can shape the future of the nutraceutical industry.

There will be no conventional delegates. The Zero-Delegate Sumflex will host only privileged guests: CEOs, founders, investors, regulators, pharma leaders, ingredient innovators, formulation experts, and global trade stakeholders invited for their ability to convert conversations into measurable business outcomes.

With this shift, Mumbai is emerging as the â??Davos of the nutraceutical industryâ? a high-impact global hub where science, regulation, investment, pharma, ingredients, AI, formulations and international trade corridors converge.

The Mumbai edition of the Nutrify Today C-Suite Sumflex will take place on June 4â??5, 2026, bringing together the leadership layer of the nutraceutical, pharmaceutical, regulatory, investment and innovation ecosystem under one roof.

Ahead of the Mumbai chapter, Nutrify Today will activate its first major international trade corridor, the Tashkent Sumflex â?? Indo-CIS Nutra Corridor, scheduled for May 20, 21, and 22, 2026, in Tashkent. This will mark a strategic step in building Indiaâ??s nutraceutical bridge into the CIS markets.

The Zero-Delegate Sumflex model is designed to move beyond traditional conference formats. Its purpose is not attendance. Its purpose is conversion.

Nutrify Today is building a global nutra trade corridor strategy with Mumbai as the central hub, connecting Indiaâ??s nutraceutical ecosystem to high-potential international markets across:

CIS, beginning with the Tashkent Sumflex â?? Indo-CIS Nutra Corridor.

Latin America is a future-facing market for science-backed supplements, botanicals and functional nutrition.

ASEAN, where regulatory adaptation, consumer demand and preventive health trends are creating new growth opportunities.

This positions Mumbai not only as a host city but also as the command centre for a broader nutraceutical globalisation strategy. Like Davos for global economic leadership, Mumbai is being positioned as the place where the nutraceutical industryâ??s most important conversations are curated, concentrated and converted into action.
