Trufrost & Butler Unveils Indiaâ??s 1st Integrated BISâ??Certified Commercial Refrigeration & Foodservice Equipment Manufacturing Facility in Bhiwandi, Maharashtra

23 June 2026 | News

The new plant positions the company as Indiaâ??s first integrated,Â BISâ??certifiedÂ manufacturing hub for premium commercial refrigeration and foodservice equipment - a milestone that strengthens domestic manufacturing and elevates Indiaâ??s role in the global foodservice equipment landscape

The new plant positions the company as Indiaâ??s first integrated,Â BISâ??certifiedÂ manufacturing hub for premium commercial refrigeration and foodservice equipment - a milestone that strengthens domestic manufacturing and elevates Indiaâ??s role in the global foodservice equipment landscape

Spread acrossÂ 1.06 lakh sq. ft., the facility brings manufacturing, assembly, quality assurance, testing, and warehousing under one roof. Designed as a multiâ??product, multiâ??line operation, it currently housesÂ eight production linesÂ with an installed capacity ofÂ 400 machines per shift, enabling the scale required to serve Indiaâ??s rapidly expanding hospitality and foodservice sectors.

The plant integrates global technology transfers, internationally benchmarked manufacturing processes, and stringent quality systems, supported by a structured roadmap to increase localisation over time. Manufacturing teams have undergone specialised overseas training with Trufrost & Butlerâ??s global partners, ensuring that every product meets international performance and reliability standards. Several categories also feature advanced capabilities such asÂ IoT connectivity,Â recipeâ??setting functions, andÂ preventive maintenance alerts.

The Bhiwandi facility has already securedÂ BIS certification for over 30 product categories, including softâ??serve freezers, coffee machines, coffee bean grinders, pizza ovens, bakery ovens, dough sheeters, bakery mixers, steamers, speed ovens,

and fryers. An additionalÂ 25 productsÂ are expected to receive certification byÂ July 2026. Select categories will also receiveÂ BEE star ratings, reinforcing the companyâ??s commitment to quality, compliance, and energy efficiency.

Neeraj Seth, Coâ??Founder, Trufrost & Butler, said: *â??Indiaâ??s hospitality industry is creating some of the most exciting foodservice brands in the world. As these businesses scale, they need equipment that meets global quality standards and delivers reliability, compliance, and strong afterâ??sales support. The Bhiwandi facility is a strategic investment to build those capabilities in India. It gives us the foundation to expand manufacturing capacity, deepen localisation, strengthen product development, and serve customers more effectively across the region. Our ambition is to create a manufacturing platform that supports not only our growth but also the longâ??term evolution of Indiaâ??s foodservice equipment ecosystem.â?*

Looking ahead, Trufrost & Butler plans to expand production lines to meet rising demand while steadily increasing local value addition across product categories. The company is also exploring export opportunities inÂ Sri Lanka, Nepal, Bhutan, the Middle East, Africa, and eventuallyÂ Europe.

As part of its longâ??term vision, the company aims to build one of Indiaâ??s most compliant and futureâ??ready manufacturing ecosystems for commercial refrigeration and foodservice equipment. The Bhiwandi facility has been designed as a scalable platform to support evolving industry requirements and contribute meaningfully to Indiaâ??s manufacturing capabilities.

Backed by growth capital fromÂ Carpediem Capital Partners, Trufrost & Butler continues to invest in manufacturing, innovation, and service infrastructure as it expands its presence across India and international markets.
