The Brain Health Ingredient Breakthrough

The brain that carries a lifetime deserves formulations grounded in science. With cognitive health concerns rising globally, formulators are exploring ingredients backed by robust research.

Arjuna Natural offers two clinically studied pathways: Somin-On, the world's first standardized Sominone from Ashwagandha, associated with BDNF support and cognitive performance in research—and BCM-95, a turmeric extract with published studies on bioavailability and antioxidant potential.

Science continues to evolve. The right foundation begins with credible, research-backed ingredients. Now have a direct talk with experts at **Vitafoods Asia 2026 Booth H5 – E35**

Get the White Paper to review the data behind next-generation cognitive health formulations.
