

Kraft Heinz voluntarily recalls Taco Bell cheese dip over botulism risk

26 July 2018 | News

According to a statement released by Kraft Heinz, as a precaution, approximately 7,000 cases of Taco Bell Salsa Con Queso Mild Cheese Dip are being voluntarily recalled because the affected product is showing signs of product separation which can lead to a potential health hazard.

There have been no consumer complaints or reports of illness related to this issue to date.

According to a statement released by Kraft Heinz, as a precaution, approximately 7,000 cases of Taco Bell Salsa Con Queso Mild Cheese Dip are being voluntarily recalled because the affected product is showing signs of product separation which can lead to a potential health hazard.

This could create conditions that could allow for the growth of *Clostridium botulinum* (C. botulinum), a bacterium which can cause life-threatening illness or death. Consumers are warned not to use the product even if it does not look or smell spoiled.

Botulism, a potentially fatal form of food poisoning, can cause the following symptoms: general weakness, dizziness, double vision, and trouble with speaking or swallowing. Difficulty in breathing, weakness of other muscles, abdominal distension and constipation may also be common symptoms. People experiencing these problems should seek immediate medical attention.
